

SHARP MATTERS

HOW
WORK SHARP
IS TRANSFORMING
THE SHARPENING
INDUSTRY

Let's face it: Sharpening your scissors, pocket knife or even kitchen knives is not a common routine in your life. But it should be. Work Sharp has worked hard to make sharpening your tools easier. Since its inception in 2006, this upstart Oregon company has been on the cutting edge of the sharpening industry. After using Work Sharp tools, it's clear that no other sharpeners deliver the same value or ease of use as Work Sharp sharpeners. Now, they've changed the game once again, launching an all-new line of innovative sharpening products. These tools—like the Pivot Plus Knife Sharpener and the Micro Sharpener and Knife Tool—bring a whole new meaning to “working sharp” while continuing to deliver the quality, performance and innovation people have come to expect from Work Sharp.

**MICRO SHARPENER
& KNIFE TOOL**

The MICRO SHARPENER & KNIFE TOOL, an ultralight, compact sharpener, fits perfectly into your pocket, pack or gear bag. The Micro's angled-guided medium-grit diamond and fine-grit ceramic rods quickly restore a sharp edge to any knife. The ultra-compact size makes this possible anywhere. The Micro Sharpener allows you to tighten down any loose knife hardware, like pocket clips or handle scales with T6, T8 and T10 drivers, while keeping your blade honed to make quick work of cardboard boxes, blister packs or whatever else you're tackling in a day's work.

**PIVOT PLUS
KNIFE SHARPENER**

The PIVOT PLUS KNIFE SHARPENER provides fast, easy and effective sharpening for any knife you own. The Pivot Plus utilizes Convex Carbide™, which is perfect for convex blade shapes, allowing for minimal material take off and extremely effective sharpening that gets to the cutting

edge immediately to get you back to work! The carbide slot can be released to pivot or locked out and remain stationary. A pivoting slot allows for the carbide to cut more aggressively, acting as a coarse grit and giving you fast results. The fine ceramic slot hones your blade back to factory sharpness and keeps you touched up between jobs. Adding even more value to this compact pocket tool, the Pivot Plus includes a tapered diamond rod for sharpening serrations and other fine edge tools. Sharpen every knife you own and be prepared for the challenge of the day. #SharpMatters
